

## COMPREHENSIVE OPERATIONS ANALYSIS

### February 2019 Update: What's Coming Next?

Last October and November, we held 7 public forums to actively engage our stakeholders in providing feedback on the region's public transit needs. A total of 77 individuals attended the forums.

In November and December, we conducted a survey to collect similar input from anyone who was not able to attend the public forums. We received a total of 333 surveys (31 from passengers on our vehicles and 302 online). The information we received from the surveys was very helpful and informative. It will take some time for us to go over all the data, but we are very happy to have so much input to sort through!

We are currently working to make sure we have all the correct financial information we need to move forward with our planning. This aspect of the project is complex and has many moving parts.

Stay tuned for a second round of public forums coming this spring!

Thank you very much for your interest in our COA Project. We hope this update is helpful and informative as we continue to work hard to maintain as many effective services as possible after July 1, 2020.
